

## TOPIC 3-2: MORE PARALLEL LINES

We learned several relationships that are formed when parallel lines are cut by a transversal.

Which types of angle pairs were congruent?

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_

Which types of angle pairs were supplementary?

1. \_\_\_\_\_
2. \_\_\_\_\_

### EXAMPLE 1

Using the figure below, identify each angle pair, and tell whether they are congruent or supplementary.

a)  $\angle 1$  &  $\angle 5$

Type:

Congruent or Supplementary?

b)  $\angle 2$  &  $\angle 3$

Type:

Congruent or Supplementary?

### EXAMPLE 2

In the figure below,  $l \parallel m$ . Find the measure of each angle.

a)  $m\angle 3 = 115^\circ$ , find  $m\angle 5$ .

b)  $m\angle 1 = 130^\circ$ , find  $m\angle 7$ .

c)  $m\angle 8 = 47^\circ$ , find  $m\angle 3$ .

**Example 3** Find the value of  $x$ .

**Example 4** Find the value of  $x$ .
