

NAME _____ DATE _____ PER _____

UNIT 1 REVIEW: FOUNDATIONS OF GEOMETRY

Match the name with its definition. Place letter in first blank. Then use the picture below to give a correct example (with symbols and letters) of that figure in second blank.

1. Point: _____ Ex: _____	A. Points that lie on the same line.
2. Line: _____ Ex: _____	B. Part of a line consisting of one endpoint and extending infinitely in one direction.
3. Line Segment: _____ Ex: _____	C. Rays that share a common endpoint, but continue infinitely in opposite directions.
4. Ray: _____ Ex: _____	D. A flat surface that continues infinitely in all directions.
5. Opposite Rays: _____ Ex: _____	E. Points that lie on the same plane.
6. Plane: _____ Ex: _____	F. An exact location in space with an indefinite shape and size.
7. Collinear: _____ Ex: _____	G. Part of a line consisting of two endpoints and all the points in between.
8. Non-Collinear: _____ Ex: _____	H. An object with no thickness that extends infinitely in two directions.
9. Coplanar: _____ Ex: _____	I. Points that do not lie on the same plane.
10. Non-Coplanar: _____ Ex: _____	J. Points that do not lie on the same line.

Using the figure below, name each of the following:

11. The intersection of BAF and GHE: _____
12. The intersection of CDA and \overrightarrow{HC} : _____
13. A point collinear with G: _____

Using the figure above, tell whether each statement is TRUE or FALSE.

_____	14. A and B are collinear.
_____	15. C, A, D, & F are coplanar.
_____	16. EFG and ABE intersect at E.

SEGMENT LENGTH - NUMBER LINE

The numbers given are the coordinates of two points on a number line. Find the distance between the two points.

17. $d =$ _____	-3 and 5
18. $d =$ _____	-11 and -27

SEGMENT ADDITION

Given that B is between A and C, find the indicated length.

19. $BC =$ _____	$AB = 5.3$ and $AC = 6.7$. Find BC.
------------------	--------------------------------------

If B is between A and C, find the value of 'x' and BC.

<p>20. $x =$ _____ BC = _____</p>	<p>$AB = 3x$, $BC = 5x$, and $AC = 8$.</p>
<p>21. $x =$ _____ BC = _____</p>	<p>$AB = 3(x + 7)$, $BC = 2(x - 3)$, and $AC = 50$.</p>

COORDINATE PLANE _ DISTANCE FORMULA

Find the length of the segment formed by connecting the points with the given coordinates. Round answers to the nearest tenth.

<p>22. $AB =$ _____</p>	<p>$A(3, 1)$ and $B(2, 4)$</p>
<p>23. $CD =$ _____</p>	<p>$C(-1, 4)$ and $D(-3, -4)$</p>

Find the length of each segment indicated below.

<p>24. $CE =$ _____</p>
<p>25. $FD =$ _____</p>

SEGMENT MIDPOINT – NUMBER LINE

The numbers given are the coordinates of two points on a number line. Find the midpoint of the segment joining the two points.

26. midpoint: _____	-2 and 6
27. midpoint: _____	4 and 12

COORDINATE PLANE – SEGMENT MIDPOINT FORMULA

Find the midpoint the segment formed by connecting each pair of coordinates.

28. midpoint: _____	A(0, 0) and B(2, 5)
29 midpoint: _____	C(-3, 3) and D(-8, -5)

Given that B is the midpoint of AC, find the coordinates of the endpoint indicated.

30. C(_____, _____)	A(-5, 1) and B(-2, 0)
---------------------	-----------------------

SEGMENTS AND BISECTORS

In the figure below, \overline{CD} bisects \overline{AB} at D. For each of the following, find the value of 'x' and the measure of the segment indicated.

31. $x =$ _____ $AB =$ _____	$AD = 2x + 11$ $DB = 4x - 5$
-------------------------------------	---------------------------------

32. $x =$ _____

$AD =$ _____

$AB = 5x - 4$

$DB = x + 1$
